Instillo GmbH was awarded the Deloitte Technology Fast 50 Award on November 08, 2018. The rankings are based on the percentage of sales growth over the last four financial years [2014-2017]. Instillo GmbH achieved a growth of 448.91 percent in this period. The self-developed technology of Instillo contributed significantly to this sales growth.

The MicroJet reactor developed and patented by Instillo is a universal tool that allows the continuous production of nano- and microparticles. But that's not all: the MicroJet reactor is also used for chemical synthesis, for the purification of complex mixtures and even for the processing of biological materials. These diverse applications, from industrial chemistry over pharmaceuticals to biotechnology, are accompanied by the extensive know-how of Instillo employees and are unique in this form.

Dr. Bernd Baumstümmler, Founder and Managing Director of Instillo, rates the remarkable sales growth rate of the last four years particularly

positive. He explains: "The great growth of Instillo is based on the continuous development of our technology. Together with our industrial and academic partners, we were able to further expand the potential of MicroJet reactor technology and develop new business fields. It is important for us to go new ways with our customers and to develop innovative solutions. This award confirms our approach and is above all the reward for the great work of our employees".

"Numerous fast-growing companies from Germany have positioned themselves in future-oriented technology fields in recent years. Responsible for this are entrepreneurs who, with their willingness to take risks and their entrepreneurial spirit, have consistently pursued their visions", explains Dr. Andreas Gentner, Partner and Head of Technology, Media & Telecommunications EMEA at Deloitte. "With the Fast 50 Award we want to honor outstanding entrepreneurial achievements for the tech location Germany."
